

Woodoc Stain Concentrate Specification Sheet

Typical Application:

Developed to tint clear Woodoc sealers, Woodoc Stain Concentrates are perfect for all decorating needs, both indoor and outdoor. Woodoc Stain Concentrates are available in eight natural wood finishes: Meranti, Imbuia, Oak, Oregon, Rosewood, Ebony, Teak and Yellowwood. They are mixed with clear Woodoc sealers and applied to clean, dry, well-sanded wood to enhance the natural colour and lustre of all woodwork.

Product Features:

Woodoc Stains are suitable for both interior and exterior applications. They contain transparent iron oxides, which absorb ultra-violet rays. The transparent oxides also highlight the wood's natural grain giving it an uncommon warmth and beauty.

Application Note:

Because the natural colour and absorbency of woods differ, the appearance attained with Woodoc Stains can differ on application. It is recommended that a trial application on a similar piece of timber be carried out first. Three coats should be applied for the desired result. If the resulting colour is too light, more tint can be added. If too dark, just add more clear Woodoc Sealer. Either way your colours turn out exactly the way you choose! If however, the desired colour is achieved after one or two coats, clear Woodoc sealers should be used to finish the job. Woodoc Stains should only be used mixed into one of the clear Woodoc Sealers.

No: WDstain/001

Dated: 20/01/03 **Replacing:** New

Name:

Woodoc Stain Concentrate

Description:

Concentrated pigmented tints with iron oxides for clear Woodoc sealers.

Application:

Mixed into clear Woodoc sealers.
