

Woodoc Colours Specification Sheet

Typical Application:

Woodoc Colours is a range of translucent colours that allow the natural grain of the wood to shine through, without compromising the sealing and protective quality of Woodoc sealers. Developed to tint clear Woodoc sealers, Woodoc Colours are perfect for all decorating needs, both indoor and outdoor.

Product Features:

There are 20 tints available in the Woodoc Colours range, varying from traditional to modern. From Mocca to Mulberry, Claret to Cocoa, Woodoc Colours are guaranteed to transform any woodwork, whether it is your garden furniture, or the kitchen cupboards. Because it is so easy to do, decorating becomes a pleasure! Woodoc Colours are pre-metered into easy-to-use bottles. Just shake, empty the contents of the bottle into the Woodoc sealer of your choice, mix thoroughly and apply to clean, dry, well-sanded wood.

- The addition of Woodoc Colours to Exterior Woodoc Clear Sealers enhance their UV resistance capabilities.

Application Note:

Because the natural colour and absorbency of woods differ, the appearance of Woodoc Colours can differ on application. It is recommended that a trial application on a similar piece of timber be carried out first. Three coats should be applied for the desired result. If the resultant colour is too light, more tint can be added. If too dark, just add more clear Woodoc Sealer. Either way your colours turn out exactly the way you choose! If however, the desired colour is achieved after one or two coats, clear Woodoc sealer should be used to finish the job.

No: WDcolour/001

Dated: 20/01/03 **Replacing:** New

Name:

Woodoc Colours

Description:

Concentrated pigment tints for clear Woodoc sealers.

Application:

Mixed into clear Woodoc sealers.
