

Woodoc Gel Stain Specification Sheet

Typical Application:

Woodoc Gel Stain is the modern – no drip, no mess, no fuss – stain for wood. Spreading easily and evenly when applied, it enriches and enhances the colour and appearance of wood. The intensity of colour is easier to control than with conventional liquid stains. New Gel Stain is available in a selected range of modern wood- as well as fashion tints: Traditional Teak, Cherrywood, African Mahogany, Antique Oak, Imbuia, Ebony, Butter, Arizona Orange, Dawn Red, Forever Green, Adriatic Blue, Purple Sky. Pine furniture can be turned into rich wood colours, light woods can become darker woods and the colour of darker woods can be enhanced. The decorating possibilities are endless.

Product Features:

Woodoc Gel Stain should be applied only to wood that is free of any previous coating, waxes or grease. Remove any old finishes/layers completely. Woodoc Gel Stain does not protect wood. After tinting use a suitable clear sealer/varnish.

Application Note:

Because the natural colour and absorbency of woods differ, the appearance attained with Woodoc Gel Stain can differ on application. It is recommended that a trial application on a similar piece of timber be carried out first. Apply with a sponge/cloth until the desired colour is achieved. Wait for at least one hour and finish off with a suitable clear sealer/varnish.

No: WGS/001

Dated: 01/10/09

Replacing: New
