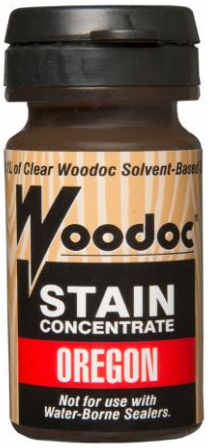
Woodoc Stain Concentrate Specification Sheet



Typical Application:
For interior- and exterior use. To tint clear Woodoc Solvent-Based Sealers, and perfect for all decorating needs, both interior and exterior.

Product Features:

- Contain transparent iron oxides, which absorb ultra-violet rays.
- The transparent oxides also highlight the wood's natural grain giving it an uncommon warmth and beauty.
- Woodoc Stain Concentrates are available in eight natural wood shades: Meranti, Imbuia, Oak, Oregon, Teak, Rosewood, Ebony and Yellowwood.
- Complete how-to-use instructions on label.

Application Note:
Because the natural colour and absorbency of woods differ, the appearance attained with Woodoc Stain Concentrates may differ on application. It is recommended that a trial application on a similar piece of timber be carried out first. Three coats should be applied for the desired result. If the resulting colour is too light, more tint may be added. If too dark, just add more clear Woodoc Sealer. Either way your colours turn out exactly the way you choose! If however, the desired colour is achieved after one or two coats, a clear Woodoc Solvent-Based Sealer should be used to finish the job. Woodoc Stain Concentrates should only be used mixed into a clear Woodoc Solvent-Based Sealer.

No: WDstain/007
Dated: 20/02/25
Name:
Woodoc Stain Concentrate
Description:
Concentrated pigmented tints with iron oxides for clear Woodoc Solvent-Based Sealers. (Imbuia, Meranti, Oak, Oregon, Yellowwood, Ebony, Rosewood, Teak).
